

Studies

► Italiano Istituto di Tecnologia	Paris, France
Postdoc Computational Neuroscience	2022 – Now
► Center for interdisciplinary research	Paris, France
PhD Neurophysiology (awarded in 2023)	2018 – 2022
► Imperial College London	London, UK
MRes Neurotechnology	2017 – 2018
► ESPCI Paris	Paris, France
MEng, Adv MSc, Physics (Biophysics option)	2014 – 2018

Scientific Experiences

► Postdoc project in Functional Neuroimaging lab – Gozzi lab IIT, CNCS	Nov 2022 – Now
■ Analysis of anaesthetized and awake mice functional connectivity with magnetic resonance imaging (fMRI) and ultrasounds (fUS)	
■ Development of dynamic models of brain connectivity for the inference of neuronal perturbations	
■ Development of computational models to predict the influence of neuronal population states on dynamic functional connectivity	
► PhD project in Team Lenkei – IPNP, INSERM U1266	Sept 2018 – Sept 2022
■ Studying functional connectivity in awake mice brain using ultrasounds (fUS)	
■ Developing an automated pipeline from acquisition to analysis for transcranial awake fUS imaging in mice	
■ Studying the fingerprint of pharmacological treatments on behaving brain functional connectivity	
► Research project at the Chadderton Lab and Breckley lab – Imperial College London	Oct 2017 – Sept 2018
■ Studying connectivity in prefrontal cortex during healthy aging	
■ Electrophysiology (patch clamp) in mouse brain slices	
■ Intracranial injection of viral vector (optogenetic)	
► Research project at the Hansen Experimental Physics Laboratory - Stanford University	Jun - Sep 2017
■ Studying implanted rats behaviour for Daniel Palanker's team retinal prosthesis project	
■ Building an experimental setup using Arduino and Python to automate freezing behaviour detection	

Extracurricular activities

- **2018-2022:** Student representative at CRI and at IPNP – organising monthly seminar, semestrial conferences, yearly retreat
- **2017-2018:** Representing the Mres Neurotechnology for Imperial College fair – BCI project : the music of the brain
- **2015-2017:** Active member of ESPCI's Hacklab : organising Arduino and atex workshops, project leader for COP-21
- **2014-2017:** Member of ParisTech sailing team – French Student Championship, «Cruise Race EDHEC »

Other Information

- Programming skills: languages CAML, Python, MAPLE, LaTeX, C, MATLAB
- Electronic skills: Arduino, Raspberry Pi
- English: reading, writing and speaking / German, Italian: basic knowledge
- Hobbies: art: linocut, exhibitions in Portbail and Senlis, France; design: mcjibulles.creator-spring.com
